EXTREME SCENTS

BEAR ATTRACTANT

**EXTREMELY POWERFUL
GREAT COVER SCENT**

Sow In Heat

NET WT 4.5 OZ (127.6g)

DIRECTIONS: Shake can for 10 to 20 seconds prior to each use. In cold weather keep container indoors until ready to use or carry container inside coat to maintain container temperature at least at 40 °. Apply using short 1 to 2 second bursts. Attractant is powerful and concentrated.

Not for use on skin or clothing.

Extreme Scents aerosol based products offer the same great scents we have provided for over 25 years but in an easier to use container. Using these attractants will encourage animals to come from a significant distance.

Extreme Scents attractants are not food based and has no nutritional value and therefore are not considered bait. Using these attractants from fixed locations are the most effective way of bringing the animals to you.

Professionals are using Extreme Scents attractants to create new sites and maintain and update successful locations. These products work in minutes rather than days because they allow the bear to use their best sense, the sense of smell.

The Extreme Scents attractants work well as cover scent when used in a broader area and near your blind or tree stand. Always use short controlled bursts to disperse the attractant. More bursts for larger application or fewer bursts for smaller area coverage.

WARNING: Contents under pressure. Do not puncture or incinerate. Do not store at temperature above 120°F as container may burst. Use only as directed. **KEEP OUT OF REACH OF CHILDREN**

- Please Recycle When Empty
- Contains No CFCs or other substances which deplete the ozone layer.
